

COMPARISON OF JUPITER 10V HOT AIR OVENS Previous vs. Updated Model

Meet the updated model of the Jupiter 10V dry heat sterilizer, which includes a number of improvements, making it the ideal choice for modern beauty salons and nail professionals. **HERE IS A DETAILED COMPARISON BETWEEN THE OLD AND NEW MODELS:**

NUMBER OF TRAYS AND CAPACITY

3 trays; up to 6 large or 27 small craft bags

5 trays; up to 10 large or 45 small craft packs, significantly reducing load times and increasing productivity

MATERIALS AND ADDITIONAL FEATURES

Standard metal components, no seal for transportation

Reinforced door hinges, better metal components, added seal for reliable protection during delivery.

BODY COLOR

Matte white, more difficult to service.

Glossy white, easy to clean and maintain appearance

DISADVANTAGES OF THE OLD MODEL

Less durable components and no transport protection can lead to wear and tear, increasing overall maintenance and repair costs

The limited number and capacity of trays increases preparation time and reduces the efficiency of work processes

ADVANTAGES OF THE NEW MODEL

Improved design and materials ensure longer life and less maintenance.

Increased capacity and number of trays contribute to faster and more efficient use in a variety of professional environments.

These improvements in the new Jupiter 10V model demonstrate the company's commitment to innovation and maintaining high standards of professional practice
